So let's go straight to the pursuit. like the car version of Alicia Silverstone, you are keyless.First, Ã¨ you need to understand what keys you have. And yet hoping not at the same time.The best scenario, of course, Ã¨ that show up exactly where you left them (Parent logic insists that they will always be "in the last place you look", but then why you should continue to look in more¹ places after that?) But you won't always be the case. Also, make sure to clean it and keep its exterior and interior in great shape as well, and be careful to avoid causing rust as the vehicle ages. Stay on schedule with all your routine maintenance, such as oil changes, tire rotations, wheel alignments, and drive discharges. Otherwise, things can get expensive quickly."If you don't, don't lose the keys. Yes, Ã¨ un ouch.Now, we promised not to go forward. There's no more end¹ way to ruin your day, and jump into a frenzy of frantic self-loathing, than to realize that you've lost your car keys.Cue what a strange dance must look like from a distance; a panic emptying pocket, cushion-sofa and trash bag-rummaging panic, usually followed by a spell spent anxiously peering through the window of your car closed desperately hoping to see lost car keys inside. Which was much more¹ than the approximately $5 it would cost to get a spare key cut at your local mall, but we promised we wouldn't roll up on this.Electronic keyFirst, the bad news: this will not be economic. Rust can make a nice number on any car. The technology needed to unlock the car remotely means that there is much else to replace if you lose the super-smart power key. Once the exclusive domain of premium car manufacturers, the proliferation of remote unlocking technology now means almost every modern car, from the most recent Holden Commodore¹, to the Hyundai i30, Mazda 3 or BMW's most expensive¹, comes with an inexpensive fob.While electronic key, lose one Ã¨ key at least a fairly simple process. Once you go further, Â Â possible and also likely that more frequent maintenance or care will be needed to keep things up, which may mean ordering new parts and obtaining more¹ fluid waste.
